Elevating Child Care: A Guide To Respectful Parenting

JANET LANSBURY

ELEVATING CHILD CARE
a guide to respectful parenting

DOWNLOAD EBOOK
Janet Lansbury’s advice on respectful parenting is quoted and shared by millions of readers worldwide. Inspired by the pioneering parenting philosophy of her friend and mentor, Magda Gerber, Janet’s influential voice encourages parents and child care professionals to perceive babies as unique, capable human beings with natural abilities to learn without being taught; to develop motor and cognitive skills; communicate; face age appropriate struggles; initiate and direct independent play for extended periods; and much more. Once we are able to view our children in this light, even the most common daily parenting experiences become stimulating opportunities to learn, discover, and to connect with our child. Elevating Child Care is a collection of 30 popular and widely read articles from Janet’s website that focus on some of the most common infant/toddler issues: eating, sleeping, diaper changes, communication, separation, focus and attention span, creativity, boundaries, and more. Eschewing the quick-fix “tips and tricks” of popular parenting culture, Janet’s insightful philosophy lays the foundation for a closer, more fulfilling parent/child relationship, and children who grow up to be authentic, confident, successful adults.

In writing this book Janet Lansbury has elevated the RIE philosophy to a whole new level. I read Magda Gerber’s books when I had my first child, and I found them to promote distant childcare - at least from my perspective of a new parent entirely steeped in the Attachment Parenting (AP) philosophy (my review of the book talks at length about the differences between AP and RIE Your Self-Confident Baby: How to Encourage Your Child’s Natural Abilities -- From the Very Start. I was
also in love with Maria Montessori’s writings advocating respect for the child, so I didn't feel Magda’s books offered a novel idea....until AP failed me. I loved spending every second with my son, I carried him everywhere, co-slept, nursed him until he self-weaned at 3.5yo, kissed him every chance I had, obsessed over his diet and bowel movements...only to find out this was never enough. He wanted more and more and more of me, until my self-sacrifice took a toll on my health and emotions. Just as an example, leaving the house was a 1-hour ordeal that started with "mommy don't go," moved into guilt trips "mommy I cry angel tears for you when you leave," proceeded into demands for treats or toys, and culminated in a heart-wrenching scream-fest a block or so down the road for all neighbors to see (might I add, in the arms of his dad which he adored, and who quit his job to be a stay-at-home parent). We were all out of give.Having amassed an extensive library of parenting books, I revisited some of them in search for answers. Magda’s book struck me differently then.
